ANTHONY CAMBONI
WEB DEVELOPER

👤 ABOUT

Recently graduated in Information Technology and Systems (Bachelor), I am looking for a job in the IT field, especially as a web developer. I started to get interested in that field about a year ago (end of 2013). Since then I invest a lot of time learning and practicing by myself. Now, I want to make it my full-time job ! I am passionate about JavaScript, I have quite solid knowledge in Java and even some professional experience in PHP. I am obviously ready to learn anything new.
